

# FEBRUARY Dental Special

Pets are family and they need dental care just like you!

Call us **TODAY #760-345-8227** to schedule an appointment for your **FREE DENTAL EXAM**, with a trained veterinary technician!!! (\*Valid for all pets that have a current annual exam.)

**10% OFF ALL DENTAL PROCEDURES**

4 out of 5 pets  
in the U.S. experience  
gum disease by age 3.

## Procedure Types Offered:

### Gentle Dental

Dental cleaning without anesthetic. This dental is indicated for pets that will sit with a dental technician, without anesthetic, and allow a dental technician to scale and polish teeth. We perform this on Dogs and Cats of all ages. Pet must be friendly and have no signs

of loose teeth and major dental disease. This is recommended for pets with minor to moderate tartar build up and DO NOT need any dental extractions.

### Gentle Dental with Sedative

Dental cleaning with sedative. This dental is indicated for anxious, nervous or aggressive pets that would not hold still for a dental cleaning and polishing. Teeth are scaled and polished while pet is sedated with extremely safe and reversible tranquilizer. This is only indicated for pets that DO NOT need any dental extractions, since your pet is not under general anesthesia.

### Full Anesthetic Dental

Dental with general anesthesia. This dental is indicated for pets that have loose or infected teeth, or moderate to major dental disease. Teeth are scaled and polished, and all loose and infected teeth are extracted while under anesthesia. We use a very high grade anesthetic. We perform an ECG of the heart and blood chemistries prior to all anesthetics to ensure your pet is the best anesthetic candidate!
